Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 2, 3, 4, 9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parrott et al (6,336,408) alone or in view of Riccitiello et al (US 3,730,891).

Parrott et al disclose the invention as claimed (see column 4, lines 3-10 and 60-64; column 1, lines 5-15; column 2, lines 6-18 and 62-66; and column 3, lines 27-37 and 53-58) except that the heat-insulating layer 34 of Parrott et al does not comprise intumescent material. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the insulating layer 34 of Parrott et al with a layer of intumescent material as claimed because the use of an intumescent coating as heat or fire insulating means is well known as evidenced by Riccitiello et al (see column 1, lines 38-41).

Response to Arguments

3. Applicant's arguments filed 6/2/2006 have been fully considered but they are not persuasive. Contrary to applicant's argument, Parrott et al clearly teach protecting heat-sensitive components of a perforating gun with layer(s) or coating(s) of heat insulating materials to reduce heat conduction (see column 4, lines 3-10 and 60-64; column 1, lines 5-15; column 2, lines 6-18 and 62-66; and column 3, lines 27-37 and 53-58). Riccitiello et al evidence that the use of an intumescent material as a heat insulating material is well known. It would have been obvious to use an intumescent material in Parrott et al because it has been held to be within the general skill

of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 571-272-7028. The examiner can normally be reached on 9:15-5:45 Monday-Friday.
